

Introduction: DFC Media Toolkit

The Coalition for a Drug Free Muskegon County consists of over 95 active members and partnering agencies in Muskegon County. Their mission is to reduce substance use disorder in Muskegon County through education, prevention and treatment.

"I am so excited that the DFC has a new, user friendly website that brings information about substance use prevention, treatment and recovery, so it is all in one place. It helps parents find facts and techniques to talk with their kids, places for community members to get involved, and information for those in need to find support and treatment options. We know that drug misuse is a community problem. The new DFC website is a tool to help our community address this issue, together."

KATE KESTELOOT SCARBROUGH
EXECUTIVE DIRECTOR
MEDIATION & RESTORATIVE
SERVICES

"As an organizing body of many community initiatives, this platform will allow us to provide accurate information to our community. Utilizing a data-driven approach, this website was a collaborative effort to increase awareness on the various substance use resources available in Muskegon County. Through this tool, we are excited to have this information easily accessible to anyone with a smartphone."
